

A SCIENCE CASE STUDY

# SCIENCE UNIVERSITY

white label implementation

University of Szeged

The RDI\* Board of the University of Szeged organized an event called **SZTE Virtus Vállalkozáskatalizátor Program** where they introduced our whitelabel solution, SCIENCER University. **150+ students generated project ideas** and worked on them within this startup course that ran for a year (two semesters).

SCIENCER University helps with tasks such as organization, communication, team building and more...

the system keeps your work safe. Users can access their projects any time, plus they are allowed to invite others to join their project.

applying for roles or looking for a new teammate has never been easier...

...and the selection process becomes faster and easier.

SCIENCER University not only served as a **social network** amongst USZ students but in the sake of **matchmaking**, we allowed them to invite students to join projects from outside their organization (other universities).

Therefore they became part of a private, professional community with diversified knowledge - with a smooth recruitment and selection process.

Projects can be filtered through various criteria,
