

# sciencer

## SOURCING & EFFICIENCY

**Realize short-term savings and long-term efficiency  
with our expertise**

We founded Sciencer to support organizations navigate various aspects of digitization, international expansion and cost optimization in an efficient and impactful manner.

## Our approach

We support our partners to identify saving opportunities, develop the necessary tool kit to have a real time view of their company.

1. We ask you to provide your payment network invoices, which we analyse through our metric system.
2. Coming back to you with a workshop to jointly identify action items and strategic cost categories.
3. We can support you through the explanation and negotiation process with the networks if needed

## Why work with us?

### PROJECT SKOP

- Thorough procurement restructuring program for a large European shoe manufacturer
- Cost optimization assessment for a Top 3 CEE transport and logistics services company
- Technical procurement synergies assessment for one of the top CEE chemical companies
